MEMORANDUM FOR: Deputy Director for Administration

FROM:

Director of Security

STAT

SUBJECT: PMCD Review of Technical Security Group

1. As you know, one of the primary goals of the recent Office of Security (OS) reorganization is to enhance our role in technical security countermeasures. While the former OS Technical Security Division, together with parts of OC, OIT, ORD and OTS, constitute the nucleus of the technical side of Physical and Technical Security (PTS), the charter has been greatly expanded and an entirely new organization has emerged. It is therefore imperative that the new organization be reviewed and officially authorized by OP/PMCD.

2. PMCD prefers not to review a new organization for a period of four to six months after its formation and, in our case, the published PMCD survey schedule does not list the Office of Security (OS) for a survey until mid-1988. While this time frame is satisfactory for the balance of OS, there are some urgent problems in PTS which will preclude our waiting this long for a review. Based on present estimates, we will have more than [ ] "high tech" positions in this group to fill through FY'87. Obviously we face tough competition for employees both internally within the Science and Technology arena and externally with the private sector. Because some scarce skill applicants are reluctant to join us unless GS grades are firm and others are inclined to leave because of grade structure uncertainties, we want to be sure that our staffing complement reflects the most favorable grade structure.

STAT

3. It is my understanding that PMCD recently adjusted its schedule to accommodate a small survey in OT&E and that this project will keep them occupied through about July of this year. Upon completion of this survey, I request your support
